- Offered in 5 Distinct Finishes (see page 16)
- Drop Forged 1045 Heat Treated Steel

SO-CAL Speed Shop is proud to announce the addition of this forged steel I-beam axle to its New Traditionalist™ product line. SO-CAL's engineering staff spent the better part of three years refining a design that takes into account the idiosyncrasies of a reproduction part that must first work with original '37- '48 Ford spindles. The axle does that and more. It defines the quality and attention to detail customers have come to expect from SO-CAL Speed Shop.
