BRAKES, VALVES

DRUM AND DISC BRAKE VALVES

Adjustable proportioning valve, 10 lb residual, and 2 lb residual valve for your brake system. When your using an aftermarket master cylinder in your rod, you need valves to keep the brake fluid flowing correctly. The 2 lb valve is for disc brakes, the 10 lb is for drum, and the proportioning valve sets your front to rear pressure balance. If you're using disc brakes front and rear, you'll need two 2 lb valves.

CHEVY CAR 2" DROP SPINDLES WITH 12" BRAKES (Shown with upgraded drilled/slotted rotors)

This new and revised kit has almost everything needed to add 12" disc brakes and 2" Drop Spindles to your disc or drum brake car, including New Loaded (with disc pads) Big piston calipers, 12" one-piece vented rotors, bearings, seals, dust caps, spindle nuts, hardware, and brake hoses. Works with most 15" or larger custom wheels. Provides a full 2 inch drop and does not change the car's steering geometry. This is the very best system for adding Big Brakes & Drop Spindles to your classic GM car! Spindles use 1970-78 Camaro calipers and 1988-92 Camaro 12" rotors. CPP rotors come with 7/16" wheel studs, original rotors will have 12MM studs. You'll need a pair of spindles and a brake set.
