## INSULATION

### DYNAMAT X-TREME

When it comes to making your hot rod ride like a luxury car, Dynamat does the job. Dynamat is used by the world's top hot rod and custom builders because they know it makes their cars ride cool and quiet. Dynamat makes cars feel solid - doors and trunks slam snug, rain and wind virtually disappear and your interior becomes a quiet, comfortable cruising environment. Use Dynamat on the interior sheet metal of your vehicle to stop vibration and reduce road noise. Add a Dynamat brand thermo acoustic liners- such as Dynaliner, Extremeliner, Tac Mat or DynaPad to fight heat and low frequency hums from big engines and exhaust systems - and you've got the ultimate ride. Dynamat is the ultimate automotive accessory.

## ELECTRIC FANS & PARTS

### ELECTRIC COOLING FANS (SPAL)

Tired of spending more time looking at your temp gauge than the road? Maybe one of these electric fans will help. There are a variety of fans with different diameters, depths, and cfm ratings. These are our most popular "movers" with great cooling capacity. The bigger the fan you can install the more air you'll move. The 16" fan will move 3000 cfm. We have them in push or pull. Call if you need more measurements or help choosing which one will work best for you.

## MECHANICAL FANS & SPACERS

### SIX BLADE STEEL COOLING FANS

These six bladed steel fans move air through the radiator and out of the engine compartment with force. These are direct mount to the water pump and will fit Ford, Chevy, Mopar and more. Be sure to measure for clearance of hoses and wiring, and don't forget a fan shroud to help direct where the fan pulls its air from. Reverse fans are for cars or trucks with a serpentine belt system with a reverse flow water pump.
